Freighter captains often go places that have little, or no, facilities for repairing ships in orbit. This sort of skid gives them an opportunity to sell additional services. The skid contains two APR, two repair system (G17.0) boxes, and two cargo boxes. It increases the BPV of the freighter by eight. The skid also adds a single crew unit (representing the repair crew).

During a scenario, the skid can generate a total number of repair points equal to the spaces of cargo in the skid; this creates a technical exception to (G17.26), in that it is a lower generation capacity. A cargo hit during the scenario may prevent the skid from generating further repair points.
